Onboarding

Our patented platform eliminates
chargeback problems and overdrafts.

Business Model

Paying the merchant's chargebacks & bounced merchant service fees.

25% fee charged on a 2 week MCA used to pay the processor.

Payback starts day after funding - automatically withholding 20% of all daily card transactions until paid.

Upsell small MCAs to larger loans & broker them.

* An MCA (Merchant Cash Advance) is a business cash advance, not a loan.

* FPS is purchasing a small % of the merchant's future credit card receivables at a discount.
