Ask: \$5M for 10% Equity at a
\$50M Valuation

1. What is Speedy?

An AI-powered fintech company combining eight financial service businesses into one platform bundled up in a “business in a box” free franchise model removing the cost barrier allowing for millions of potential franchises – rapid scaling.

2. Why is it different?

AI engine

8 AI-driven revenue streams, thousands of lenders, a patent-pending fintech engine that solves a huge problem in the multi-trillion-dollar electronics payments industry that produces 25% returns every two weeks on average on the capital deployed to eliminate 100% of chargeback losses for credit card processing companies.

Franchise model

Speedy makes 100% of the revenue and 50% of the profit as soon as the sales office signs the exclusive contract. On the first day, all the franchise’s revenue becomes Speedy’s instead of a typical 7%–8% monthly royalty fee.

Benefits

Zero acquisition cost – scales by boarding processors with thousands or millions of subscribers that automatically opt in at once (not merchants one by one).

Speedy Franchises already outperformed the most successful franchises in history by boarding 73 sales offices in a record 3 weeks with over 1k waiting with only \$1k ad spend.

Early traction

One of the strongest Fintech teams ever assembled at this early stage to execute and scale fast.

Fintech platform has been nominated in the category FINTECH STARTUP OF THE YEAR in the United States for the Northern American Startup Awards Edition 11 on December 22nd, 2025.

3. Why should I care?

IPO planned at record speed in October 2027 with a high projected valuation and ROI range of 100-1000x, depending on deployment and achievement of key milestones, backed by data and available upon request.

4. What should I do next?
